Objective

Seeking a software engineering position at a dynamic company where I can leverage my skills in development, problem-solving, and system automation.

Work and Employment

Software Engineer

XYZ Technologies, June 2019 - Present

- Led development of cloud-based applications using Python and Docker.
- Implemented CI/CD pipelines with Jenkins and automated testing.
- Collaborated with cross-functional teams to optimize system performance.

Junior Developer

ABC Corp, July 2017 - May 2019

- Assisted in developing web applications using JavaScript and React.
- Wrote SQL queries to manage and retrieve data for reporting.
- Developed automated scripts in Python to enhance the deployment process.

Education and Training

B.Sc. in Computer Science

University of Example, Graduated 2017

- Relevant Coursework: Data Structures, Algorithms, Operating Systems

Skills

- Programming: Python, JavaScript, C#, SQL
- Tools: Docker, Jenkins, Git, AWS, Kubernetes
- Other: Agile Development, Unit Testing, CI/CD, REST APIs

Accomplishments

- AWS Certified Solutions Architect, 2020
- Published a paper on cloud-native applications at the 2021 Tech Conference.
- Developed and deployed an internal tool that reduced deployment times by 30%.
